

Role Atlas — every move and ability, and what it is tagged as

ABRA · generated from `engine/roles.py` · 2026-07-24

Generated directly from the tagger, so it cannot drift. `uses` = real in-battle uses for moves, revealed sets for abilities. Blank role = deliberately untagged (ordinary damage, a passive modifier, or a gap worth filling).

Roles in the taxonomy: **38**. Moves listed: **538**. Abilities listed: **107**.
