

Tag review — corrected pass

133 tags. Usage from **5,440 open-sheet human games** — 65,976 sheet entries, 263,581 move slots.

Every point from your review

you said	what I did
Scope Lens?	added — items had no crit tag at all. Also Super Luck, Merciless
max is 1.5 crit	documented — the ratio is a <i>stage</i> feeding P(crit); crit damage stays $\times 1.5$
Sniper makes crits 3x	added as a third crit parameter — but it is $\times 2.25$. It was $\times 3$ when crits were $\times 2$
tag never-miss moves	<code>neverMisses</code> — 34.4% of move slots
Horn Drill is also OHKO	tagged. The whole OHKO family has zero usage in 260,799 slots
how do you model Mold Breaker	one boolean gating every defender-ability tag
do we need the priority table	already correct — it probes <code>onModifyPriority</code> . Gap: Quash and priority items
you can use negative prio vs Farig	verified: $+3 \rightarrow 0.984$ blocked, 0 and $-6 \rightarrow 0.000$
does Gale Wings check full HP	verified — the probe passes real HP, so the condition evaluates
is Draining Kiss contact	yes. Exactly 4 special contact moves exist, 3 see play
.75 same, differ enemies vs my side too	split <code>spreadFoes</code> (9.7%) / <code>spreadAll</code> (2.0%)
Rock Slide only hits the enemy side	you were right, I was wrong. It is <code>allAdjacentFoes</code>
what is Dazzling	the ability, on Bruxish. Three names for one identical effect
these are just % chance to flinch	<code>flinches</code> now carries P(flinch), 10%–100%
King's Rock	added — same parameter, from the item side
Wide Guard: side condition or protect	split <code>oneTurnGuard</code> / <code>sideBuff</code> / <code>hazard</code>
hazards are different than Reflect	separated — their side, prices future switches
some recoil moves have more than others	now carries the fraction. Head Smash 1/2, Flare Blitz 33/100
restores MY hp or PARTNER hp	split <code>healsSelf</code> / <code>healsAlly</code> , reconciled with <code>drain</code>
make sure Wide Guard works	it does not — rollout engine only. 2,065 uses
Trick Room needs its own tag	<code>reversesSpeed</code> . Wonder Room, Magic Room and Gravity separated too
accuracy tags — Gravity	<code>accuracyMod</code>
Wonder Room makes items useless?	close — Wonder Room swaps Def/SpD ; <i>Magic Room</i> kills items. Both tagged
charge needs a weather sub-tag	<code>chargeSkippedByWeather</code> — Electro Shot in rain, Solar Beam in sun
or Power Herb (future proofing)	<code>skipsChargeTurn</code> — nonstandard today, derived so it works the day it is legal
Phantom Force / Meteor Beam not weather	correct — excluded

you said	what I did
these are just switch moves not damage	split <code>pivotDamaging</code> / <code>pivotStatus</code> / <code>passesState</code>
is Substitute its own class	yes — added
Coaching would never be used on the enemy	boosts split by sign , not by target field
Decorate almost never on the foe	same fix — 525 Coaching and 18 Decorate were mistagged as debuffs
you could Decorate a Contrary Staraptor	Mega Staraptor does have Contrary. <code>expectedBoostSign</code> already handles the inversion
Memento is an Explosion-like move	<code>userFaints</code>
Encore is sorta like choice lock	<code>locksTarget</code>
status section for the Prankster buff	<code>statusCategory</code> — 38.5% of move slots, unnamed until now
Weather Ball / Expanding Force	<code>weatherScaled</code> / <code>terrainScaled</code>
do we know what each berry resists	yes — the dex names it. 16 in play, 9.8% of items
Lum Berry?	<code>curesStatus</code> — a different class from the resist berries
Cursed Body / Toxic Debris under contact?	different triggers . Contact now derived from handler source
is "something happens when hit" enough	yes for the decision, no for the number
Reflect and Light Screen into damage calcs	they are not . 5,187 uses, zero effect on damage
no hardcodes	contact, weather/terrain setters, Intimidate, redirection and Sniper now derive from handler source. 18 name-based definitions remain, counted in the tool
Tailwind should be its own category	<code>doublesSideSpeed</code> — 6,981 uses, and it sets speed order, not damage
Aurora Veil with the screens, fails without snow	<code>halvesDamage</code> + <code>failsWithoutWeather</code>
should each major status have its own tag	yes — burn / paralysis / sleep / poison split. Each sets a different parameter
Matcha Gotcha and Flare Blitz get one too	right — status now read from secondaries , not just the primary
Toxic is different from normal poison	split. Flat 1/8 vs escalating n/16 — a different clock
Yawn inflicts drowsy	<code>delayedSleep</code> — a volatile, not a status. Forces a switch
Perish Song needs its own	<code>perishClock</code> — ignores HP, typing, items, abilities
Baneful Bunker spreads poison	I had missed it — the poison is in <code>condition.onHit</code> . Also catches Spiky Shield chip

you said	what I did
Strength Sap lowers their Attack too	declared in <code>onHit</code> , not <code>boosts</code> — now read
lowersTarget needs the stat and direction	carries it now, mirroring <code>boostsUser</code>
Taunt doesn't lock, it prevents status	<code>forbidsStatusMoves</code> — the Assault Vest restriction, applied to them
Disable is like Cursed Body but for non-attacks	both present — <code>locksTarget</code> and <code>disablesAttacker</code>
Haze clears all stat changes	<code>clearsBoosts</code> — 359 uses, and it wipes yours too
explain oneTurnGuard for Quick Guard	the parameter now names the class: Wide Guard blanks spread , Quick Guard blanks priority
shouldn't Coil get the defense and attack tags	it already did — the doc was hiding parameter values. Now shown
does the engine know what boostsUser boosts	it did not. <code>movesBoostMe</code> is only a sign, so Dragon Dance and Swords Dance read identically
Quick Claw and Bright Powder	added — <code>fractionalPriority</code> and <code>accuracyMod</code> , both derived
Sand Veil and Bright Powder	found a mistag — Sand Veil and Snow Cloak were labelled typeImmunity. They are evasion abilities
how do accuracy/evasion stages work	a different table — [1, 4/3, 5/3, 2, ...] not [1, 1.5, 2, ...]. And nothing applies them
Life Dew heals self 25% too	you asked for "or BOTH" originally and my split was exclusive. Fixed — 1,683 uses
should all the weathers have their own tag	no — what a weather does belongs to the weather, and that table is in the damage engine
we need to code in Trick too	item changes now tracked. Knock Off is 1,640 uses and the board saw none of it
Knock Off breaks Sash from damage anyway	you were right — the Sash drag needs full HP. The real cost is a stale Assault Vest or Choice Scarf
Knock Off is 1.5x on a held item — a variable move	it uses <code>onBasePower</code> , which my probe missed. That gap alone missed 4,351 appearances
almost all Whimsicott are Focus Sash	measured: 78.0% in our corpus, and the Smogon prior says 78.6%. Which argues against max-bulk as a default
what if we just assume max bulk	<code>ABRA_BULK=max</code> toggle. Measured gap is ~6% median — about one damage roll
will we leave too many kills on the table	on average no. But Whimsicott +25%, Mega Beedrill +31% — the bimodal ones
do we need all 16 rolls	yes, and it is easiest. Exactly correct, no floor() inversion edge cases, and free
is that gonna butcher calc time	no — damage is 0.03% of a self-play run. 2.18M calls/sec
we don't know EVs so these are guesses	yes — but a weighted distribution of ~6 spreads per species, narrowed by the revealed nature

The two gaps this surfaced

Screens do not affect damage. board.js derives the screen set correctly, then feeds it to one consumer — a DODUO joint feature that is switched off. Light Screen 2,346 + Reflect 1,988

- Aurora Veil 853 = **5,187 uses**, and none of them halve a single damage number.

Wide Guard exists only in the rollout engine, behind a hardcoded 35% heuristic. board.js has nothing. **2,065 uses**.

70 of 133 tags are read by nothing

tag	usage	sets
profitsFromHit	10.4%	the target gains something for being hit
resistBerry	9.5%	halves one super-effective hit, then is gone
damageMultType	8.6%	x1.2 on one type
weatherSetter	6.5%	weather := x on switch-in
preventsStatDrop	6.2%	stat drops simply do not apply
boostsWhenLowered	6.2%	+2 to a stat when any stat is lowered
contactPunish	6.1%	the ATTACKER pays for touching it
healsAllyOnSwitchIn	4.8%	restores the partner on entry
extendsScreens	2.9%	side conditions last 8 turns not 5
blocksStatusMoves	2.2%	every Status-category move fails against it
speedOnItemLoss	2.1%	speed x2 once its item is gone
restoresStats	2.0%	undoes stat drops once
blocksBerries	1.9%	their berries cannot be eaten
weatherChipImmune	1.8%	takes no sandstorm or snow residual damage
lowersUser	1.4%	WHICH of my own stats drop, as the price of the move
needsUntrackedState	1.3%	power depends on state the board does not track
weatherScaled	1.2%	type, power or target changes with the weather
disablesAttacker	1.2%	the move I just used is removed from MY options
thawsTarget	1.1%	unfreezes the target it hits
ignoresProtect	1.0%	Protect does NOT stop it
accuracyMod	0.8%	P(hit) is scaled, for or against the holder
accuracyMod	0.8%	P(hit) scaled, often gated on a weather or a category
boostsProcedural	0.8%	stat changes exist but are computed, not declared in a field
boostsMoveClass	0.7%	x1.2-1.5 on moves carrying ONE FLAG
pivotStatus	0.7%	no damage, an effect, then the user leaves
conditionalPower	0.6%	fixed power x a multiplier when a condition holds
chargeSkippedByWeather	0.6%	the charge turn DISAPPEARS under one weather
needsTargetToAttack	0.6%	FAILS unless the target is attacking this turn
healsSelf	0.5%	restores a share of MY max HP, costing the turn
multiHit	0.4%	hits = n (or a distribution)
statusImmune	0.4%	a status cannot land

tag	usage	sets
inflictsConfusion	0.3%	P(confusion): they hit themselves some of the time
ignoresStatStages	0.2%	the boost multiplier does not apply, permanently
blocksSoundMoves	0.2%	they cannot use sound moves for 2 turns
clearsScreens	0.2%	destroys Reflect, Light Screen and Aurora Veil on their side
survivesFromFull	0.2%	a lethal hit from full HP leaves 1
proceduralStatus	0.2%	one status from a set, chosen at random in the handler
curesStatus	0.2%	a status is removed the moment it lands
ignoresStatStages	0.2%	the boost multiplier does not apply
ignoresDefenderAbility	0.2%	suppress every defender-side ability tag for this move
preventsCrit	0.1%	$P(\text{crit}) = 0$
failsWithoutWeather	0.1%	the move does NOTHING unless a weather is up
overridesEffectiveness	0.1%	the type chart is WRONG for this move
critRatioUp	0.1%	$P(\text{crit})$ raised
critRatioUp	0.1%	$P(\text{crit})$ raised
boostsTarget	0.1%	positive stat stages on a BODY THAT IS NOT ME
perishClock	0.1%	everything on the field dies in 3 turns unless it switches
delayedSleep	0.1%	they fall asleep at the end of NEXT turn unless they switch
addsFlinch	0.1%	$P(\text{flinch}) \pm 10\%$ on moves that do not already flinch
fractionalPriority	0.1%	a CHANCE to move first inside the priority bracket
clearsBoosts	0.1%	every stat stage on the field $:= 0$, both sides
accuracyMod	0.0%	$P(\text{hit})$ is scaled for everyone
forcesSwitch	0.0%	the TARGET is removed from the field
critDamageUp	0.0%	the CRIT MULTIPLIER itself, not its probability
terrainScaled	0.0%	power or target changes with the terrain
alwaysCrit	0.0%	$P(\text{crit}) = 1$
passesState	0.0%	the incoming Pokemon INHERITS something
hazard	0.0%	their side is damaged or slowed on switch-in, until removed
ohko	0.0%	removes the target outright
critRatioUp	0.0%	$P(\text{crit})$ raised
fixedDamage	0.0%	damage is a constant, not a formula
terrainSetter	0.0%	terrain $:= x$ on switch-in
swapsDefences	0.0%	Def and SpD are exchanged, field-wide
suppressesItems	0.0%	held items stop working, field-wide

tag	usage	sets
ignoresAbility	0.0%	the defender's ability does not apply
blocksSecondary	0.0%	added effects do not apply to the holder
preventsStatDrop	0.0%	stat drops do not apply
contactPunish	0.0%	hurts anything that makes contact
skipsChargeTurn	0.0%	the charge turn is skipped for any charge move
preventsSwitch	0.0%	the foe cannot leave

read? is a grep for the probe string — wrong in both directions. A shortlist to verify, not a verdict.

COVERAGE — nothing common is missing from this document

The per-tag sections further down only list things that **have** a tag. Anything untagged would never appear. This section lists everything above **0.05% of usage** regardless, so a gap is visible rather than absent.

MOVES — 167 above 0.05% (97.0% of all usage)

4 of these carry NO tag at all. For a plain attacking move that is correct — there is nothing unusual to say. For anything else it is a gap.

blocksSoundMoves — **they cannot use sound moves for 2 turns ← NOT READ**

Throat Chop. The sound flag already exists on the moves it blocks, so this is a join rather than new information

entry	appearances	parameter
Throat Chop	1,778	blocks:sound

Total tagged: **1** · share: **0.2%**

`clearsScreens` — destroys Reflect, Light Screen and Aurora Veil on their side ← NOT READ

Psychic Fangs (1,352 uses), Brick Break (289), Raging Bull. The answer to 5,187 uses of screens, and it lands as a damaging move rather than costing a turn

entry	appearances	parameter
Psychic Fangs	1,356	clears:screens
Brick Break	293	clears:screens
Raging Bull	8	clears:screens

Total tagged: **3** · share: **0.2%**

`proceduralStatus` — one status from a set, chosen at random in the handler ← NOT READ

Dire Claw (1,509 uses) rolls poison / paralysis / sleep at 10% each; Tri Attack rolls burn / paralysis / freeze. The secondary declares a chance and no status, so every status probe misses them

entry	appearances	parameter
Dire Claw	1,520	p:0.3,oneOf:[psn,par,slp],each:0.1
Tri Attack	1	p:0.2,oneOf:[brn,par,frz],each:0.067

Total tagged: **2** · share: **0.2%**

`ignoresStatStages` — the boost multiplier does not apply ← NOT READ

Darkest Lariat (1,232 uses), Sacred Sword. Setup means nothing into them, so a boosted target is no safer than an unboosted one -- and it is the same switch a crit flips

entry	appearances	parameter
Darkest Lariat	1,259	ignores:target defensive stages
Sacred Sword	145	ignores:target defensive stages

Total tagged: **2** · share: **0.2%**

`failsWithoutWeather` — the move does NOTHING unless a weather is up ← NOT READ

Aurora Veil needs snow. Clicking it on a clear field is a wasted turn, and no feature can currently say so

entry	appearances	parameter
Aurora Veil	860	needsWeather:true
Magnet Rise	1	needsWeather:true

Total tagged: **2** · share: **0.1%**

overridesEffectiveness — **the type chart is WRONG for this move ← NOT READ**

Freeze-Dry, 748 uses: x2 into Water where the chart says x0.5. A 4x error, and mcEff is a static lookup that cannot see the handler

entry	appearances	parameter
Freeze-Dry	748	overrides:true
Flying Press	3	overrides:true

Total tagged: **2** · share: **0.1%**

critRatioUp — **P(crit) raised ← NOT READ**

a higher crit stage, which the damage distribution should weight rather than ignore

entry	appearances	parameter
Psycho Cut	193	critRatio:2
Stone Edge	111	critRatio:2
Leaf Blade	109	critRatio:2
Blaze Kick	87	critRatio:2
Shadow Claw	69	critRatio:2
