

Tagging pass — first draft for review

Generated from `data/tags.json` by `engine/tag_dex.js`. Nothing hand-listed: every tag is derived from a dex field or a handler probe, so it stays correct when the format changes.

The idea

A tag says **what parameter a mechanic sets**, never *"special-case this one"*. So one damage distribution consumes all of them and there is no per-mechanic branch to get subtly wrong.

mechanic	sets
ordinary move	$P(\text{crit}) = 1/24$
Flower Trick, Storm Throw, Frost Breath	$P(\text{crit}) = 1$
Shell Armor / Battle Armor on the defender	$P(\text{crit}) = 0$
Dual Wingbeat	hits = 2
Bullet Seed	hits ~ {2:35%, 3:35%, 4:15%, 5:15%}
any move	$P(\text{hit}) = \text{accuracy}$

Then $P(\text{kill}) = P(\text{total damage} \geq \text{remaining HP})$ over the whole distribution. Focus Sash falls out for free — it only saves when the *first* hit is lethal and the rest are not, which is exactly why a multi-hit move goes straight through it.

The column that matters

read? is whether any feature actually consumes the parameter. It is a grep for the probe string, so it can be wrong in both directions — treat it as a shortlist to verify, not a verdict. Two false positives were already found and fixed this way (Sturdy shared the Focus Sash probe).

23 of 64 tags are currently unread.

MOVES

tag	sets	usage	read?	why it matters
protectBlocked	Protect stops it	32.9%	NO	the protect family is priced against this, and a move that ignores Protect must not be
multiHit	hits = n (or a distribution)	0.6%	NO	total damage is n x base, and it BREAKS Focus Sash and Sturdy -- the first hit takes the holder to 1, the rest kill
critRatioUp	P(crit) raised	0.1%	NO	a higher crit stage, which the damage distribution should weight rather than ignore
forcesSwitch	the TARGET is removed from the field	0.1%	NO	Whirlwind, Dragon Tail, Roar. Undoes setup and changes who is in front of you
alwaysCrit	P(crit) = 1	0.0%	NO	x1.5 and ignores the defender's positive defensive boosts
ohko	removes the target outright	0.0%	NO	a different kill calculation entirely
fixedDamage	damage is a constant, not a formula	0.0%	NO	Seismic Toss and Night Shade ignore stats entirely
ignoresAbility	the defender's ability does not apply	0.0%	NO	Mold Breaker-style moves walk through Levitate and the damage-reducing abilities
priority	order = priority	14.7%	yes	who moves first, before speed is consulted at all
contact	triggers contact punishment on the defender	14.3%	yes	Rocky Helmet, Rough Skin, Iron Barbs, Static, Flame Body all cost you for touching
stalling	is a Protect-family move	8.5%	yes	protectThreatened and deadStall both hang off it
spread	x0.75 and it also hits my ally	5.7%	yes	the ally half is what allyHit is for, and the 0.75 is a damage parameter
flinches	P(flinch) on a faster hit	4.0%	yes	Fake Out. Blocked by Covert Cloak and by Inner Focus, neither of which is checked
setsScreen	a side condition	2.8%	yes	Reflect, Light Screen, Tailwind, Safeguard -- halved damage or doubled speed for five turns
recoil	costs the user HP	2.2%	yes	a cost the score does not currently carry
heals	restores HP	1.8%	yes	and healing an ALLY is a pair feature that exists in DODUO
variablePower	basePower is computed, not fixed	1.8%	yes	Gyro Ball, Low Kick, Grass Knot, Weather Ball, Facade, Acrobatics. A fixed bp reads them wrong in both directions
sound	bypasses Substitute, blocked by Soundproof	1.8%	yes	also the trigger for Throat Spray
selfSwitch	the user leaves after damaging	1.6%	yes	U-turn, Volt Switch, Flip Turn. Momentum, and the switch features cannot see it

tag	sets	usage	read?	why it matters
boostsUser	stat stages on self	1.1%	yes	the setup family, derived rather than listed
drain	heals a fraction of damage dealt	1.1%	yes	changes the value of clicking it into a healthy target
redirects	takes the turn's single-target attacks	0.9%	yes	Follow Me and Rage Powder. A pair feature in DODUO and nothing in the single-move vector
powder	fails into Grass types, Overcoat and Safety Goggles	0.9%	yes	this is how Rage Powder is beaten, and redirection is scored as if it always works
setsRoom	a pseudo-weather that reverses or reorders	0.8%	yes	Trick Room. It set this FOR Will and then lost to it
chargeTurn	costs a turn before it lands	0.8%	yes	and the request omits the target field on the locked turn, which already broke the player once
inflictsStatus	status := x	0.5%	yes	burn halves physical damage, paralysis halves speed -- both are damage/order parameters
lowersTarget	stat stages on the foe	0.4%	yes	Intimidate-shaped effects from a move; also what Clear Amulet and White Herb answer
setsWeather	weather := x	0.2%	yes	and whether that weather HELPS is the thing nothing currently asks (task #19)
recharge	costs the turn AFTER it lands	0.2%	yes	Hyper Beam. A free turn for the opponent
setsTerrain	terrain := x	0.0%	yes	same as weather: redundancy is detected, benefit is not

ITEMS

tag	sets	usage	read?	why it matters
resistBerry	halves one super-effective hit, then is gone	9.6%	NO	Chople, Colbur, Kasib, Occa. About 6.8% of held items and it turns kills into non-kills
damageMultType	x1.2 on one type	8.7%	NO	Charcoal, Black Glasses, Mystic Water, Fairy Feather. About 6.7% of held items and a pure calculation error
extendsScreens	side conditions last 8 turns not 5	3.0%	NO	3.1% of items
restoresStats	undoes stat drops once	2.0%	NO	2.1% of items, and it changes what a drop is worth
blocksSecondary	added effects do not apply to the holder	0.0%	NO	Covert Cloak. Fake Out does not flinch through it, and nothing checks
preventsStatDrop	stat drops do not apply	0.0%	NO	Clear Amulet turns Intimidate into nothing
contactPunish	hurts anything that makes contact	0.0%	NO	a cost of clicking a contact move that is not currently priced
megaStone	the holder becomes another species	27.3%	yes	different stats, typing and ability from turn one
survivesFromFull	a lethal hit from full HP leaves 1	11.4%	yes	Focus Sash, the most-held item in the format. Broken by multi-hit moves and by any prior chip
healsAtHalf	restores 25% when it drops below half	10.5%	yes	Sitrus, 10.8% of items. Modelled in the rollout engine only, invisible to MAG
damageMultAll	x damage on everything	9.3%	yes	Life Orb 1.3, at a cost this does not model
passiveHeal	restores HP every turn	6.4%	yes	changes how many turns a kill takes
choiceLock	the holder is locked into one move	5.8%	yes	the single strongest thing an open sheet tells you about what they can do next turn
speedMult	speed x1.5	5.8%	yes	order, which most kill features hang off
blocksPowder	powder moves fail against the holder	0.0%	yes	Safety Goggles beats Rage Powder redirection outright
statMult	raises one stat	0.0%	yes	Band, Specs, Assault Vest, Eviolite

ABILITIES

tag	sets	usage	read?	why it matters
profitsFromHit	the target gains something for being hit	15.0%	NO	Stamina, Weak Armour, Berserk, Anger Shell, Justified, Rattled. Task #18 -- Will's Bellibolt case
weatherSetter	weather := x on switch-in	9.4%	NO	and megaing can COST you it, which is Will's reason to decline a mega
contactPunish	hurts or afflicts anything making contact	8.7%	NO	Rough Skin, Iron Barbs, Static, Flame Body, Effect Spore
statusImmune	a status cannot land	3.2%	NO	Limber, Immunity, Insomnia, Vital Spirit, Water Veil, Magma Armor
survivesFromFull	a lethal hit from full HP leaves 1	0.3%	NO	Sturdy. Identical to Focus Sash and NOT modelled anywhere -- verified 0 mentions
preventsCrit	$P(\text{crit}) = 0$	0.2%	NO	Shell Armor and Battle Armor. Turns Flower Trick from a guaranteed crit into an ordinary hit
terrainSetter	terrain := x on switch-in	0.0%	NO	same shape as weather
preventsSwitch	the foe cannot leave	0.0%	NO	Shadow Tag, Arena Trap, Magnet Pull. Already used by the playstyle classifier
damageBoost	$x > 1$ damage dealt	14.8%	yes	Adaptability, Technician, Tinted Lens, Sheer Force, Iron Fist, Strong Jaw
onSwitchInDrop	stat stages on the foe at switch-in	13.4%	yes	Intimidate. Beaten by Clear Amulet and by White Herb, neither of which is checked
priorityMod	order shifts for a class of move	12.1%	yes	Prankster, Gale Wings, Triage. stallIntoEncore already depends on it
typeImmunity	damage of one type := 0	10.5%	yes	Levitate, Water Absorb, Flash Fire, Sap Sipper. Clicking into one wastes the turn entirely
speedCond	speed x2 under a condition	4.0%	yes	Chlorophyll, Swift Swim, Sand Rush, Slush Rush, Unburden, Quick Feet. Already probed for the speed order
blocksMove	a whole class of move fails	3.9%	yes	already derived for allySideBlockProb -- Dazzling, Armor Tail, Good as Gold
redirectsType	draws that type to itself	2.6%	yes	Lightning Rod and Storm Drain redirect AND boost
damageReduce	$x < 1$ damage taken	1.1%	yes	Filter, Solid Rock, Multiscale, Thick Fat, Heatproof, Fluffy. Overcalling kills without them
formeChange	the species changes mid-battle	0.5%	yes	Zero to Hero (needs a switch), Illusion, Imposter, Disguise
invertsBoosts	stat changes flip sign	0.3%	yes	Contrary and Simple, already probed for expectedBoostSign

Unread, ordered by how often it actually appears

tag	usage	sets
protectBlocked	32.9%	Protect stops it
profitsFromHit	15.0%	the target gains something for being hit
resistBerry	9.6%	halves one super-effective hit, then is gone
weatherSetter	9.4%	weather := x on switch-in
damageMultType	8.7%	x1.2 on one type
contactPunish	8.7%	hurts or afflicts anything making contact
statusImmune	3.2%	a status cannot land
extendsScreens	3.0%	side conditions last 8 turns not 5
restoresStats	2.0%	undoes stat drops once
multiHit	0.6%	hits = n (or a distribution)
survivesFromFull	0.3%	a lethal hit from full HP leaves 1
preventsCrit	0.2%	$P(\text{crit}) = 0$
critRatioUp	0.1%	$P(\text{crit})$ raised
forcesSwitch	0.1%	the TARGET is removed from the field
alwaysCrit	0.0%	$P(\text{crit}) = 1$
ohko	0.0%	removes the target outright
fixedDamage	0.0%	damage is a constant, not a formula
terrainSetter	0.0%	terrain := x on switch-in
ignoresAbility	0.0%	the defender's ability does not apply
blocksSecondary	0.0%	added effects do not apply to the holder
preventsStatDrop	0.0%	stat drops do not apply
contactPunish	0.0%	hurts anything that makes contact
preventsSwitch	0.0%	the foe cannot leave

Usage share is per-slot: for moves it is the share of all move slots on real teams, for items and abilities the share of all sheet entries. 65,280 entries.
