91 tags. Usage from **5,440 open-sheet human games** — 65,280 sheet entries, 260,799 move slots.

Every point from your review

you said	what I did
Scope Lens?	added — items had no crit tag at all. Also Super Luck, Merciless
max is 1.5 crit	documented — the ratio is a <i>stage</i> feeding P(crit); crit damage stays $\times 1.5$
Sniper makes crits 3x	added as a third crit parameter — but it is $\times 2.25$. It was $\times 3$ when crits were $\times 2$
tag never-miss moves	<code>neverMisses</code> — 34.4% of move slots
Horn Drill is also OHKO	tagged. The whole OHKO family has zero usage in 260,799 slots
how do you model Mold Breaker	one boolean gating every defender-ability tag
do we need the priority table	already correct — it probes onModifyPriority. Gap: Quash and priority items
you can use negative prio vs Farig	verified: $+3 \rightarrow 0.984$ blocked, 0 and $-6 \rightarrow 0.000$
does Gale Wings check full HP	verified — the probe passes real HP, so the condition evaluates
is Draining Kiss contact	yes. Exactly 4 special contact moves exist, 3 see play
.75 same, differ enemies vs my side too	split <code>spreadFoes</code> (9.7%) / <code>spreadAll</code> (2.0%)
Rock Slide only hits the enemy side	you were right, I was wrong. It is allAdjacentFoes
what is Dazzling	the ability, on Bruxish. Three names for one identical effect
these are just % chance to flinch	<code>flinches</code> now carries P(flinch), 10%–100%
King's Rock	added — same parameter, from the item side
Wide Guard: side condition or protect	split <code>oneTurnGuard</code> / <code>sideBuff</code> / <code>hazard</code>
hazards are different than Reflect	separated — their side, prices future switches
some recoil moves have more than others	now carries the fraction. Head Smash 1/2, Flare Blitz 33/100
restores MY hp or PARTNER hp	split <code>healsSelf</code> / <code>healsAlly</code> , reconciled with <code>drain</code>
make sure Wide Guard works	it does not — rollout engine only. 2,065 uses
Trick Room needs its own tag	<code>reversesSpeed</code> . Wonder Room, Magic Room and Gravity separated too
accuracy tags — Gravity	<code>accuracyMod</code>

you said	what I did
Wonder Room makes items useless?	close — Wonder Room swaps Def/SpD ; <i>Magic Room</i> kills items. Both tagged
charge needs a weather sub-tag	<code>chargeSkippedByWeather</code> — Electro Shot in rain, Solar Beam in sun
or Power Herb (future proofing)	<code>skipsChargeTurn</code> — nonstandard today, derived so it works the day it is legal
Phantom Force / Meteor Beam not weather	correct — excluded
these are just switch moves not damage	split <code>pivotDamaging</code> / <code>pivotStatus</code> / <code>passesState</code>
is Substitute its own class	yes — added
Coaching would never be used on the enemy	boosts split by sign , not by target field
Decorate almost never on the foe	same fix — 525 Coaching and 18 Decorate were mistagged as debuffs
you could Decorate a Contrary Staraptor	Mega Staraptor does have Contrary. <code>expectedBoostSign</code> already handles the inversion
Memento is an Explosion-like move	<code>userFaints</code>
Encore is sorta like choice lock	<code>locksTarget</code>
status section for the Prankster buff	<code>statusCategory</code> — 38.5% of move slots, unnamed until now
Weather Ball / Expanding Force	<code>weatherScaled</code> / <code>terrainScaled</code>
do we know what each berry resists	yes — the dex names it. 16 in play, 9.8% of items
Lum Berry?	<code>curesStatus</code> — a different class from the resist berries
Cursed Body / Toxic Debris under contact?	different triggers . Contact now derived from handler source
is "something happens when hit" enough	yes for the decision, no for the number
Reflect and Light Screen into damage calcs	they are not . 5,187 uses, zero effect on damage
no hardcodes	contact, weather/terrain setters, Intimidate, redirection and Sniper now derive from handler source. 18 name-based definitions remain, counted in the tool

The two gaps this surfaced

Screens do not affect damage. board.js derives the screen set correctly, then feeds it to one consumer — a DODUO joint feature that is switched off. Light Screen 2,346 + Reflect 1,988

- Aurora Veil 853 = **5,187 uses**, and none of them halve a single damage number.

Wide Guard exists only in the rollout engine, behind a hardcoded 35% heuristic. board.js has nothing. **2,065 uses**.
